1.2 BACKGROUND

The key initiatives that drive the proposed work of the Texas Center for Student Supports are the Student Support Framework, Parent and Family Engagement Playbook, Advisory Groups, Focus Groups, and the development and implementation of job-embedded professional learning and coaching to support LEAs and ESCs.

The Texas Center for Student Supports Grant stems from the understanding that all students across Texas deserve safe, inclusive, supportive, and healthy learning environments to improve the emotional well-being of students and improve academic achievement with reduced disciplinary actions. The grant is designed to support LEAs and ESCs in developing systematic, sustainable changes in student support.

Research consistently shows that safe, inclusive, supportive/healthy learning environments are associated with overall emotional well-being and improved academic achievement for all students, especially in overcoming challenging and traumatic experiences. Such a framework helps LEAs develop a clear, research-based system of approach, align Student Support Systems, and build the "why" behind necessary changes for all stakeholders. Many districts have used a system of support previously; however, TCSS is dedicated to providing the training, a systematic, sustainable framework, and parent/family engagement to meet the needs of each student's behavioral, emotional, and physical health needs and promote overall student well-being and academic improvement.
